

SPORTIDENT EQUIPMENT HIRE AND TIMING SERVICES

What is SportIdent?

SportIdent is a system which is used at many types of event to both time and score competitors. Each competitor carries a small plastic 'SportIdent Card' which is quickly 'punched' into the hole in the top of the electronic stations which are located at each checkpoint.

The card contains a computer chip which picks up data, such as the locations and times they were visited, from each checkpoint that it is 'punched' into. This data can then be downloaded into a computer at the Finish to give information about which controls the competitor has visited and how long it took to get there from the previous control, along with their overall time taken. Each competitor is given an immediate printout that provides a summary of their performance. The computer will also create overall results for your event.

What services do we offer?

We offer a tailor-made service to fit in with your event, budget and needs.

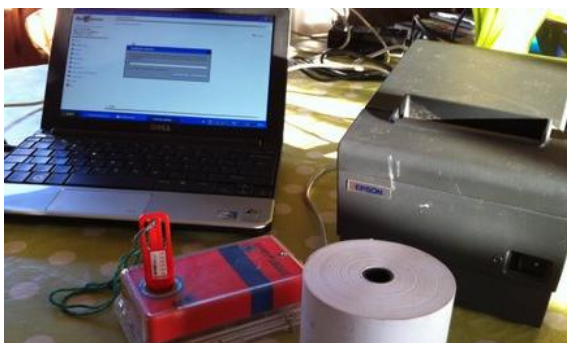

This can be as simple as purely hiring you the equipment required to use the system at your events through to offering consultancy on how to operate the equipment or even attending the events and operating the system for you.

Our specialists are able to attend events and create and run registration, download, produce the results or even assisting you in putting out checkpoints. For more information about how **Mud and Sweat** can help at your events, please contact us.

What equipment do we have available for hire?

30 x Checkpoint Stations
2 x Start Stations
2 x Finish Stations
1 x Clear Station (Erases data on SportIdent Cards)
1 x Check Station

1 x Laptop with Specialist Timing Software
1 x Splits / Results Printer
1 x Car Battery and Power Invertor (Allows use of Laptop and Printer in areas where no mains power is available)

A Small Number of SportIdent Cards
Tyvek Wrist Straps

Wire Strops for Securing Checkpoint Stations to trees or other immovable objects
Checkpoint Stakes and High Visibility Kites

We also have access to other suppliers who can provide extra Checkpoint Stations and SportIdent Cards if required.

Checkpoint Stations can either be put on plastic stakes with or without high visibility 'kite's, or if security is an issue, we have wire strops that can be used to attach the stations to immovable objects such as trees – these strops are secured using a special tool (which we supply).

The SportIdent Cards can be attached to competitors in a number of ways – either attached to their wrist using a tyvek strap, attached to a lanyard or similar that can be hung around their neck, or attached to a bike or vehicle using a special yo-yo for example. There are several versions of the SportIdent Cards, SI Card 9 will hold up to 50 Checkpoint Visits whereas the SI Card 5 will only hold 36 Checkpoint Visits.

How much does it cost?

Our hire charges can be found in the table below. Prices are subject to change without notice and are subject to VAT at 20%.

Please note; our hire charges are based on how many days the equipment will be used for on the event itself. We aim to ship the equipment to you, to arrive at least one day prior to your event – if you require it to arrive earlier than this, for example to set up early, we would charge 30% of the daily rate listed below for every extra days hire.

For example; if your event is taking place on a Saturday, we will courier the equipment to arrive with you on the day before (Friday). We would expect the equipment not to be used on the Sunday and then for you to return the equipment to us on the Monday, to arrive back with us by the Tuesday – you would only be charged 1 days hire. If you require the equipment by the Thursday, so that you can put out the checkpoints on the Friday, for use on the Saturday – you would be charged 1.3 days hire. If you a running multi-day events back-to-back, we can discuss a discount for each additional event day hire, please ask us for a quote.

Where you require additional equipment that we do not hold, we can either arrange to put you in touch with other suppliers to provide it, or we can hire it for you and pass on the direct cost (their costs may be different to ours).

Item	Cost (Per Day) Excluding VAT	Cost (Per Day) Including VAT
Checkpoint Station	£ 3.50	£ 4.20
Start Station	£ 4.00	£ 4.80
Finish Station	£ 4.00	£ 4.80
Clear Station	£ 4.00	£ 4.80

Consultancy/Attending Event	P.O.A	
Mileage – If Attending Event	£0.40 Per Mile	

Other information

Upon booking the equipment, we require a 20% Deposit. Full payment is required within 14 days of your event taking place – we will raise a Final Invoice on return of the equipment.

We strongly recommend that you insure the equipment whilst it is in your possession, as we expect you to pay for any any damage or loss that occurs. To give you an idea of the cost of replacing the equipment – an SI Card 5 would cost £34 (inc VAT), a Checkpoint Station costs £114 (inc VAT), the Thermal Splits Printer costs £276 (inc VAT) and the Timing Laptop costs £300 (inc VAT).

When couriating the equipment back, you must ensure that it is packed adequately and that you use a courier where the item is tracked and insured to a minimum value of £5,000.
